

Are Our Leaders Lying?

Renz Law, LLC would like to thank the courageous whistleblowers that shared this data with us. Renz Law has seen screenshots of some of this data as well as query programs used to mine the data. We have done sufficient due diligence to feel comfortable submitting this data to a court.

www.renz-law.com

1

“PUT ASIDE ANY IDEOLOGICAL, POLITICAL, OR WHATEVER DIFFERENCES, AND JUST GET VACCINATED. WE’LL MAKE THE VACCINE EASY AND CONVENIENT FOR PEOPLE. WE HAVE GREAT VACCINES,” HE SAID. “THEY’RE SAFE AND HIGHLY EFFECTIVE.”
[FAUCI EXPLAINS HOW TO PREVENT MORE THAN 100,000 DEATHS BY DECEMBER \(MSN.COM\)](#)

[CORONAVIRUS VACCINE BOOSTER: CDC’S ROCHELLE WALENSKY OVERRULES HER OWN AGENCY | NATIONAL REVIEW](#)
ON MARCH 30 2021, CDC DIRECTOR DR. ROCHELLE WALENSKY DECLARED ON NATIONAL TELEVISION THAT, “OUR DATA FROM THE C.D.C. TODAY SUGGESTS THAT VACCINATED PEOPLE DO NOT CARRY THE VIRUS, DON’T GET SICK. . . . AND THAT IT’S NOT JUST IN THE CLINICAL TRIALS, IT’S ALSO IN REAL-WORLD DATA.”

Our Data

2

- Our data comes from a whistleblower with access to CMS data.
- CMS data includes billing, prescribing, treatment, and all other information related to beneficiary treatment – that is how the government knows how much money to send healthcare providers.
- This info was all recognized by the US Department of Defense in the presentation we found and reposted on www.renz-law.com
- Our whistleblowers have searched this data to provide these numbers.
- This data is being hidden from be public but would be easily searchable for government analysts using the same searches we did.
- Our question – why aren't our elected officials and bureaucrats searching for this information and sharing it?

Project Salus

Medicare Statistics

4

Percentage of Americans covered by Medicare in 2019:

18.1%

59.4 Million People

- 18% of 330 Million is: 59,400,000
- Total Medicare Budget: \$899 Billion (2020)
- Largest data base available in the U.S. to study COVID-19 trends
- Includes all claims: vaccine dates, treatment dates, death dates, adverse events, hospitalizations, is not self-reporting like VAERS.

As you can see in the slides below that were excerpted from a presentation by the FDA, the FDA is tracking the data we are presenting here. In other words they know or should know this info.

Source: <https://www.statista.com/topics/1167/medicare/>

COVID Vaccine Deaths CMS Data

5

Number of CMS beneficiaries who died within 14 days* of a COVID-19 vaccine:

Age Group	# of Persons who died within 14 days of a COVID-19 vaccine
<= 80 years old	19,400
Over 80 years old	28,065
<i>Total</i>	<i>47,465</i>

*within 14 days of 1st or 2nd dose, whichever difference was lower
PER THE CDC – YOU ARE NOT CONSIDERED VACCINATED UNTIL TWO WEEKS AFTER YOUR SECOND SHOT OR FIRST SHOT OF JANSEN SO THESE DEATHS DO NOT COUNT - <https://www.cdc.gov/coronavirus/2019-ncov/vaccines/fully-vaccinated.html>

What We Are Showing

6

- The next two slides are excerpts from an FDA presentation that was leaked online.
- The first slide shows that the FDA planned to monitor CMS data for side effects in nearly real time to watch for the safety of the COVID vaccines.
- The second slide shows the side effects that they were monitoring for.
- Following those two slides we are providing raw data from whistleblowers on the numbers of those side effects in several states.

The Center for Biologics Evaluation and Research (CBER) Plan to Monitor Vaccine Side Effects

7

“Near real-time surveillance” or rapid-cycle analyses (RCA)

- FDA plans on monitoring 10 -20 safety outcomes of interest to be determined based on:
 - Pre-market review of sponsor safety data submitted to FDA
 - In coordination with federal partners, international regulatory partners and organizations, academic experts, others
 - Literature and regulatory experience with similar vaccines, novel vaccine platforms, and using other relevant data
 - FDA plans on using CMS data for COVID-19 vaccine RCA – near real time with efforts

The FDA, with CBER, said they would monitor the following conditions post-vaccine

8

FDA Safety Surveillance of COVID-19 Vaccines : **DRAFT Working list of possible adverse event outcomes** *****Subject to change*****

- Guillain-Barré syndrome
- Acute disseminated encephalomyelitis
- Transverse myelitis
- Encephalitis/myelitis/encephalomyelitis/
meningoencephalitis/meningitis/
encepholopathy
- Convulsions/seizures
- Stroke
- Narcolepsy and cataplexy
- Anaphylaxis
- Acute myocardial infarction
- Myocarditis/pericarditis
- Autoimmune disease
- Deaths
- Pregnancy and birth outcomes
- Other acute demyelinating diseases
- Non-anaphylactic allergic reactions
- Thrombocytopenia
- Disseminated intravascular coagulation
- Venous thromboembolism
- Arthritis and arthralgia/joint pain
- Kawasaki disease
- Multisystem Inflammatory Syndrome
in Children
- Vaccine enhanced disease
